

BETON TROWEL

CONCRETE FINISHING
& COMPACTION

HEAVY DUTY BUMPCUTTER

- The heavy duty bumpcutter (or highway straight edge as it is sometimes called) is designed to assist in achieving good "F" numbers and is especially invaluable when making "superflat floors" where near zero tolerances are demanded
- Each part of the floor finishing process can cause disturbance to the floor. The use of dry shake toppings or powerfloats will change the floor tolerance so using the bumpcutter will scrap away the high spots and help move some material into low spots
- The bumpcutter is supplied with outriggers to avoid bowing of the blade
- Delivered with pitch control head and 3x 1,8m extension handles
- Quick and easy to assemble and to handle

SPECIFICATIONS:

Code	Dimensions	Weight
BT101026C	300cm	13,0kg
BT101027C	365cm	14,0kg
BT101028C	500cm	15,0kg
