

BETON TROWEL

CONCRETE FINISHING
& COMPACTION

BTCS10EE 10 INCH EARLY ENTRY SAW

The BTCS10EE Concrete Cutter is a powerful and reliable cutting machine designed to make your concrete cutting tasks easier and more efficient. With a range of advanced features and options, it offers exceptional performance and precision for professional contractors and DIY enthusiasts alike.

- Guide releasing lever on the handle for easy and precise cutting guidance
- Direction lever on the handle connects with the self-propel system, providing effortless maneuverability
- Electronic depth control system with a clear depth indicator for accurate and consistent cutting depths

- Enclosed blade cover effectively reduces dust diffusion, ensuring a cleaner and safer working environment
- Electric start engine and techo meter available for convenient and reliable operation
- Cyclone air filter included as standard for enhanced engine performance and longevity
- Footbrake feature prevents the wheels from rolling uncontrollably, ensuring operator safety
- Vac port on the blade cover (optional) for efficient dust extraction and a cleaner work area

SPECIFICATIONS:

- Dimensions: 1480x665x1100 mm
- Weight: 163 kg
- Blade Size: 254 mm (10")
- Max. Cutting Depth: 38 mm
- Depth Adjustment: Electric Control
- Self-Propel: Yes
- Guide Releasing: Lever
- Engine: Honda GX270 Cyclonic Air Filter
- Output Power: 6,5 kW (9HP)
